

Framery Four

Cable routing guide

CABLE INPUT

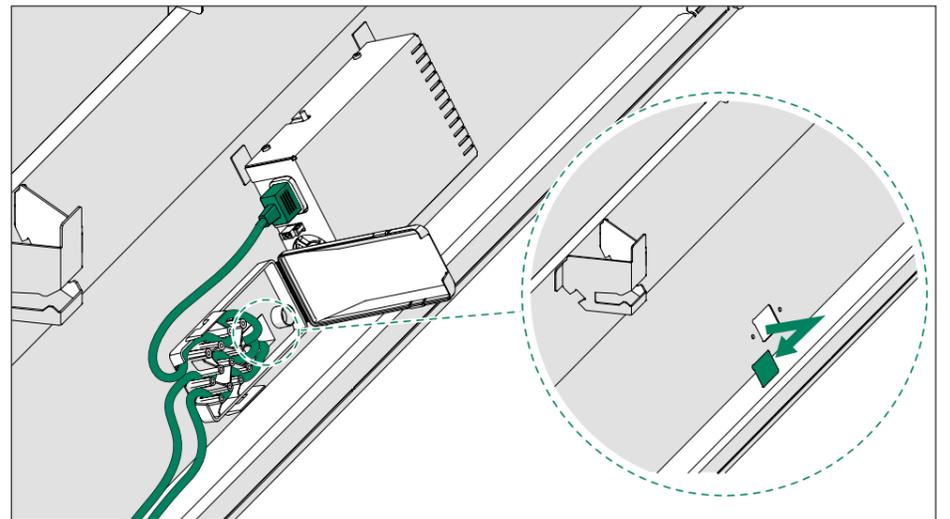

Input locations, floor

2 cords can be pulled inside the pod along the same route as the power cord.

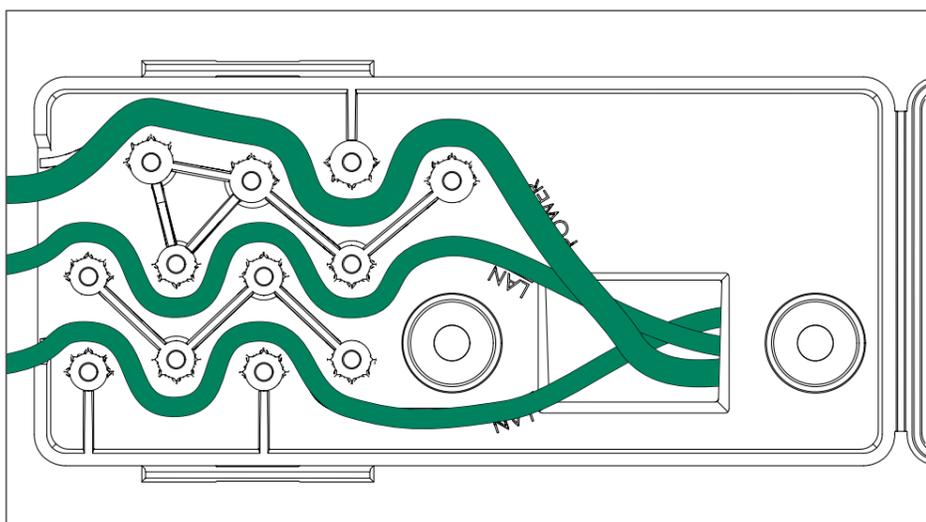

If more cords are needed, they can be pulled from the other side of the pod.

Precut

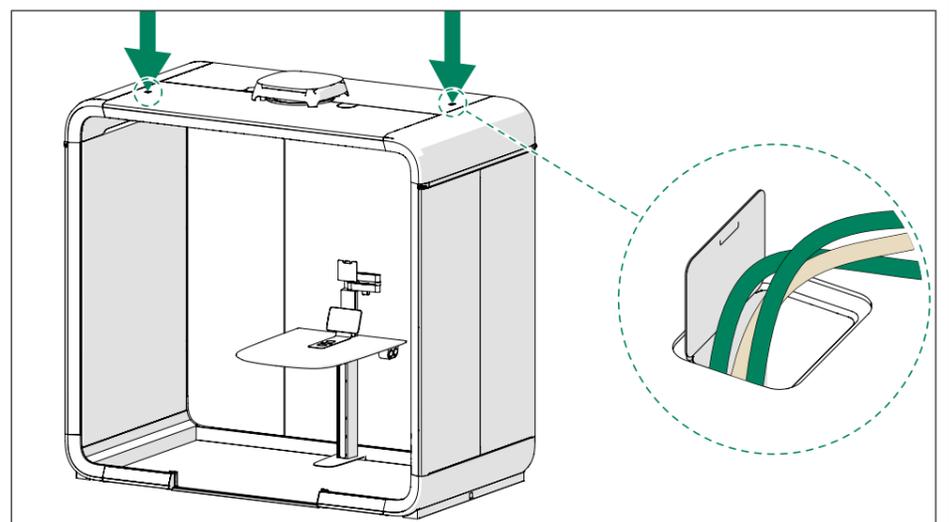

Both bottom corners have precuts for cables.

Strain relief

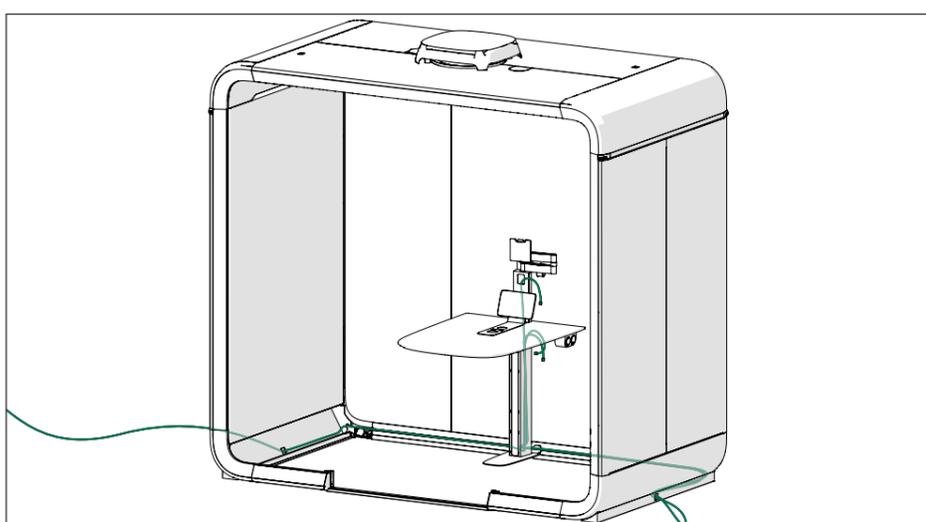

Max three cables in one strain relief.

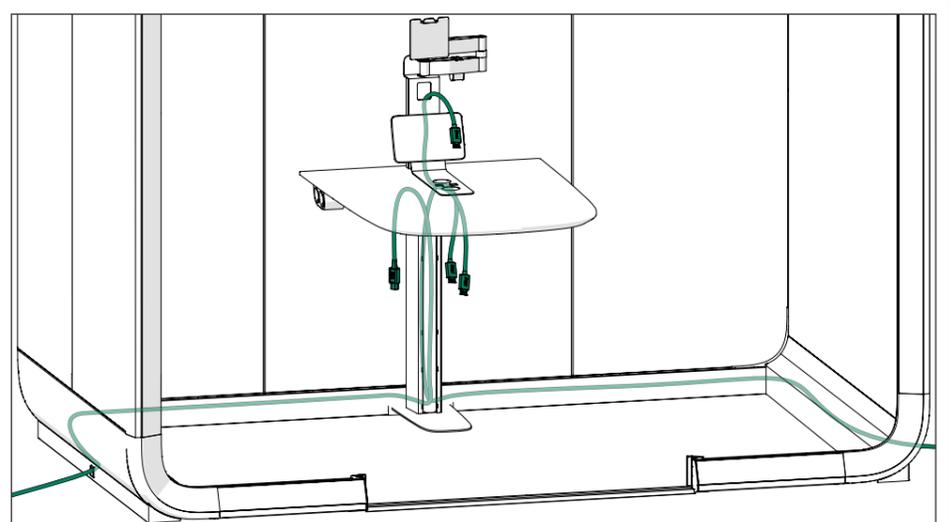

Input locations, roof

Routing

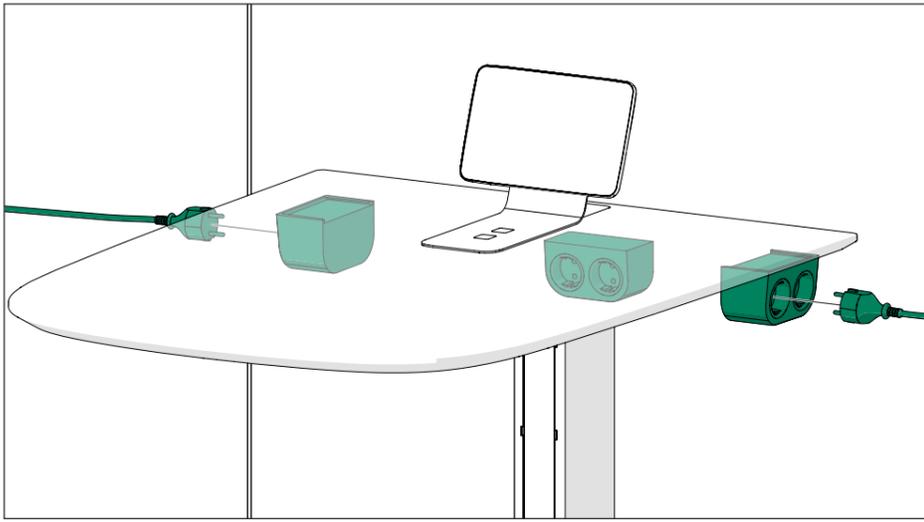

Cables can be routed from either side of the pod behind the cable channels and kickboards.

Cords can be routed inside the table leg and up to the monitor or tabletop.

CONNECTIONS

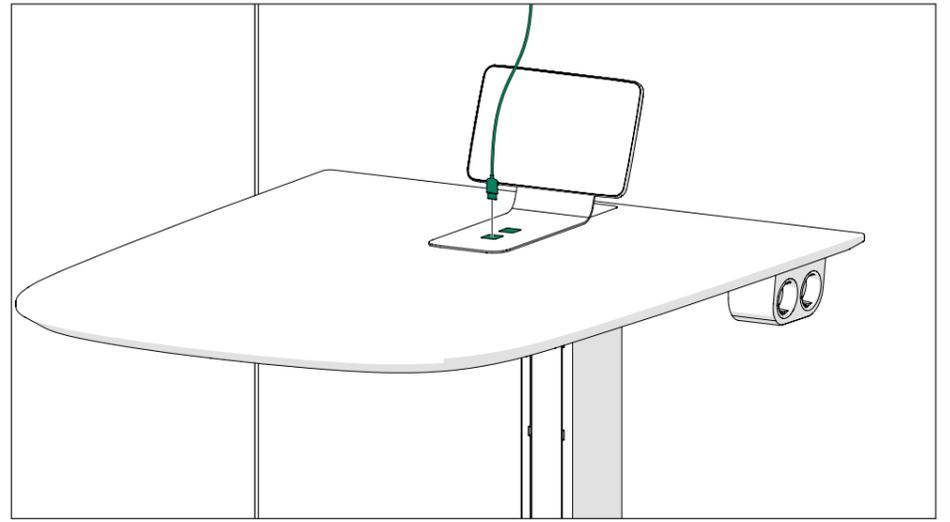

Power outlets

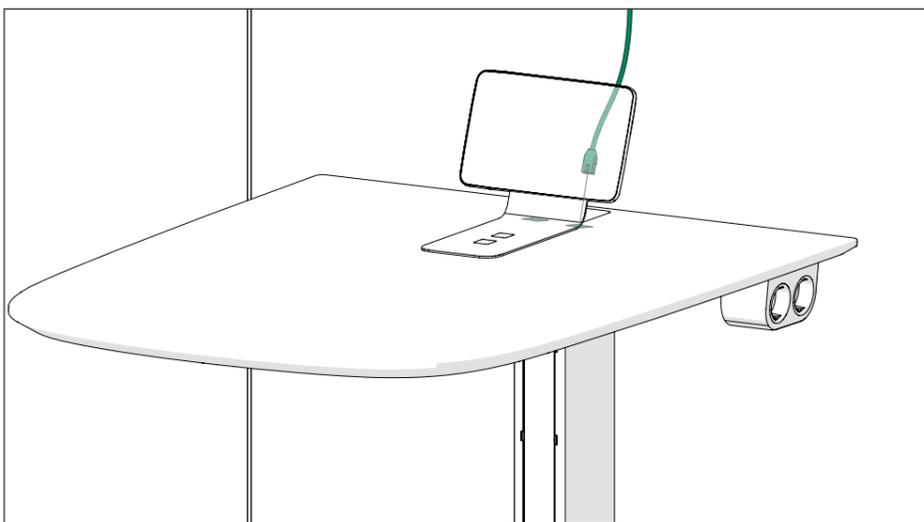

4 under-table power outlets

Optional: extra 2 under-table power outlets (included with the monitor arm)

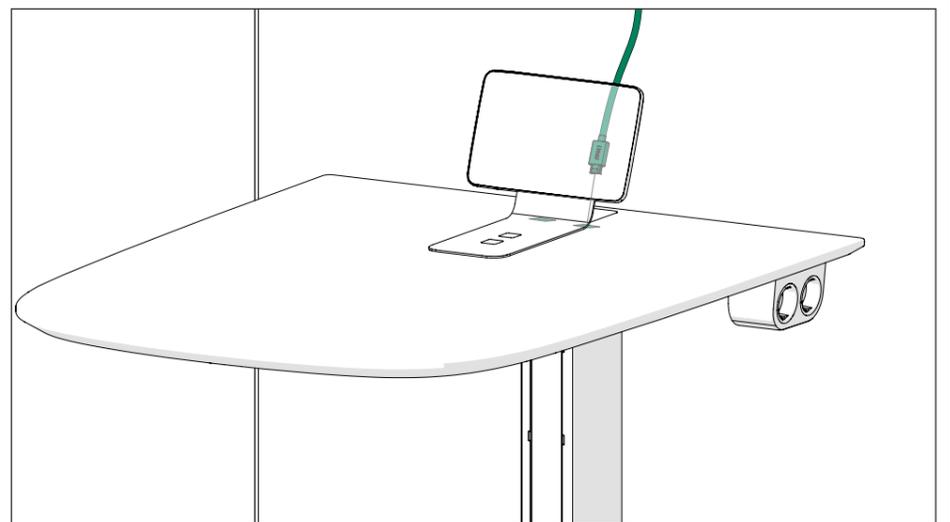

Optional USB-C ports

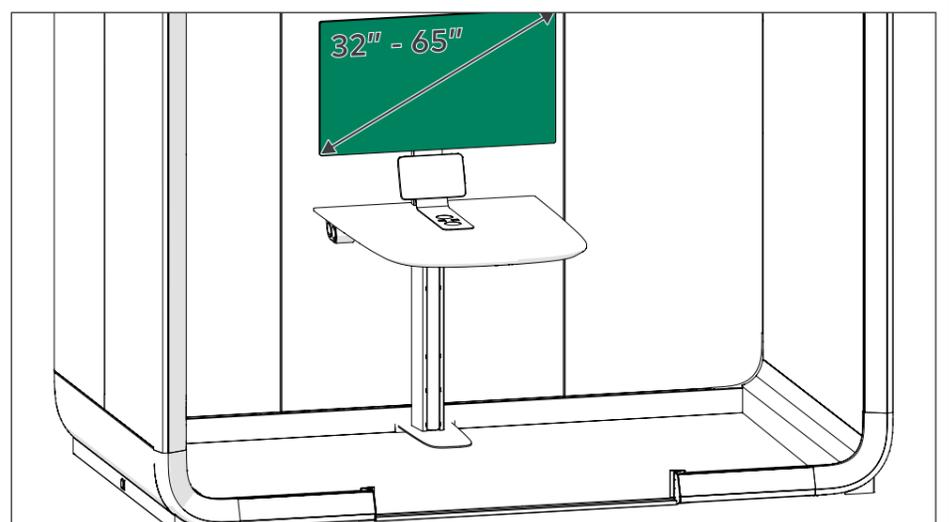

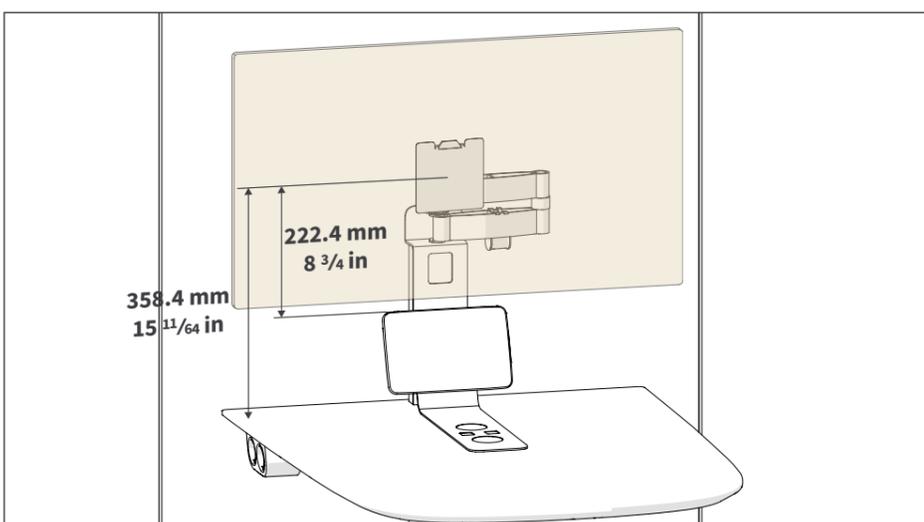

Optional LAN ports

Optional HDMI ports

MEASUREMENTS

The monitor arm is suitable for monitors from 24" to 27". Max weight 15 kg / 33 lbs with a flat 75 x 75 or 100 x 100 center-positioned VESA mounting surface.
